

ENVIRONMENTAL POLICY

of Czech Airlines j.s.c.

We are the flag carrier of the Czech Republic ensuring connections to most European capital cities and to destinations worldwide. We offer services with high added value in the segment of air transport and related services. We represent the Czech Republic on the internal and foreign markets.

We are aware of our responsibility for environment protection and that is why we declare this Environmental policy of Czech Airlines, based on the following principles:

We respect legal regulations concerning environment protection and we meet other requirements regarding our activities.

We strive to achieve permanent decrease of both direct and indirect environmental impacts from our activities.

We continuously improve environmental management system and environmental performance of the company.

When taking a strategic decision, we always consider its environmental impact. We apply the environmental pollution prevention principle.

We efficiently use the capacity of our aircraft and other technology and we judge the environmental impact of the operation.

When expanding and upgrading our fleet, we always consider emission production and noise pollution of the aircraft.

We prioritize usage of appropriate technologies and techniques for aircraft and technology maintenance and ground handling with the aim of pollution prevention and minimization of environmental impact.

We periodically evaluate the fulfilment of our environmental commitments and objectives and provide information to the stakeholders about our environmental performance.

We closely cooperate with our suppliers, authorities and other partners to reduce environmental impact from our activities.

Ing. Miroslav Dvořák
President, Czech Airlines j.s.c.
Prague, 30th July 2011
